

If you are **50 years and older...**

the **Shingles Vaccine**

should be on your TO-DO list!

FACTS

- It is caused by the same virus that causes chickenpox. The virus stays in your body and can resurface any time as shingles – a painful, blistering rash. Even if you feel healthy, your *risk for shingles increases as you get older.*
- One out of three people will develop shingles. Risk factors include age (50+ years), weakened immune system (due to diseases, cancer treatments, medications), and history of chickenpox.
- The shingles vaccine (Zostavax®) can reduce the risk of developing shingles and its associated pain.

Where

See Below for Eligibility
By Appointment Only

Lancaster State Health Center
1661 Old Philadelphia Pike
