## **Congratulations on the Birth of Your Baby!**

The Tioga County Partnership for Community Health welcomes your new little one and wants to recognize the week of April 24-30 as Infant Immunization Week – but why limit it to a week? We want to celebrate the lifetime of care that you will shower upon your newborn all month long!

The gifts in this bag are given through funds made available through the Pennsylvania Chapter of the American Academy of Pediatrics, the Pennsylvania Immunization Coalition and the Tioga County Partnership for Community Health.

With permission, your name will be entered in a drawing for a grand prize including a gift card and other items after your child is six-months old and we verify that he or she is current on immunizations at that point in time.

## **Congratulations on the Birth of Your Baby!**

The Tioga County Partnership for Community Health welcomes your new little one and wants to recognize the week of April 24-30 as Infant Immunization Week – but why limit it to a week? We want to celebrate the lifetime of care that you will shower upon your newborn all month long!

The gifts in this bag are given through funds made available through the Pennsylvania Chapter of the American Academy of Pediatrics, the Pennsylvania Immunization Coalition and the Tioga County Partnership for Community Health.

With permission, your name will be entered in a drawing for a grand prize including a gift card and other items after your child is six-months old and we verify that he or she is current on immunizations at that point in time.

Please fill out the attached card and return it to the Wellsboro WIC office or UPMC Wellsboro (before you leave the hospital). We will honor all confidentiality and the names/addresses and other information will never be used for any other purpose other than to verify records. With permission, names and pictures will be taken of the grand prize winner. The grand prize drawing will be during the month of November 2023.

Why six-months? By the age of six months, most infants have received their primary vaccinations, but more are needed throughout the child's life to ensure protection from horrible diseases. Vaccines are proven to be safe and effective and your primary care physician follows guidelines and schedules recommended by the Center for Disease Control. It is important that you stay on track by attending all well-child visits and following the recommended vaccination protocols.
