

#UDontGetIt

teens need **3** vaccines
in addition to an annual flu vaccine

UDontGetIt.org

HERE'S WHAT U DON'T GET:

Tetanus, Diphtheria, Pertussis, Meningitis, Human Papillomavirus (HPV)

All are serious diseases that can cause symptoms and complications such as brain damage, severe scarring, amputation of limbs, fever, lockjaw, seizures, irregular heartbeat, difficulty breathing, kidney damage, genital warts, cancer and even death.

These diseases are preventable if teens receive 3 vaccines.

Tdap: 1 dose | **MCV4:** 2 doses | **HPV:** 2-3 doses

Get your vaccines so #UDontGetIt
